Key statistics

In trend terms, in October 2024:

- unemployment rate remained at 4.1%.
- participation rate increased to 67.2%.
- employment increased to 14,541,200.
- employment to population ratio remained at 64.4%.
- underemployment rate remained at 6.3%.
- monthly hours worked increased to 1,971 million.

In seasonally adjusted terms, in October 2024:

- unemployment rate remained at 4.1%.
- participation rate decreased to 67.1%.
- employment increased to 14,537,500.

- employment to population ratio remained at 64.4%.
- underemployment rate decreased to 6.2%.
- monthly hours worked increased to 1,972 million.
- full-time employment increased by 9,700 to 10,037,700 people.
- part-time employment increased by 6,200 to 4,499,800 people.

Key statistics - Trend

	Sep-24	Oct-24	Monthly change	Monthly change (%)	Yearly change	Yearly change (%)
Employed people	14,504,400	14,541,200	36,800	0.3%	407,000	2.9%
Unemployed people	622,600	623,500	800	0.1%	64,700	11.6%
Unemployment rate	4.1%	4.1%	0.0 pts	na	0.3 pts	na
Underemployment rate	6.3%	6.3%	0.0 pts	na	-0.3 pts	na
Participation rate	67.1%	67.2%	0.0 pts	na	0.4 pts	na
Monthly hours worked in all jobs	1,966 million	1,971 million	5 million	0.3%	48 million	2.5%

Key statistics - Seasonally adjusted

	Sep-24	Oct-24	Monthly change	Monthly change (%)	Yearly change	Yearly change (9
Employed people	14,521,600	14,537,500	15,900	0.1%	387,100	2.7
Unemployed people	617,500	625,800	8,300	1.3%	66,500	11.9
Unemployment rate	4.1%	4.1%	0.0 pts	na	0.3 pts	r
Underemployment rate	6.3%	6.2%	-0.1 pts	na	-0.2 pts	r
Participation rate	67.2%	67.1%	0.0 pts	na	0.3 pts	na
Monthly hours worked in all jobs	1,969 million	1,972 million	3 million	0.1%	48 million	2.5%

Estimates of changes throughout this release are calculated using un-rounded level estimates and may be different from, but are more accurate than, movements obtained from the rounded level estimates.

For definitions of labour statistics used in this publication, please refer to <u>Glossary of Labour Force, Australia methodology (/methodologies/labour-force-australia-methodology/oct-2024#glossary)</u>.

Survey impacts and changes

Minor changes to the Labour Force Survey questionnaire from October 2024

In October 2024, the ABS introduced very minor changes to the Labour Force Survey questionnaire, to collect additional underutilisation information from groups of people outside of the labour force. These small changes in July and October have not affected any of the existing statistics the ABS produces, but will support future improvements to the range of underemployment and underutilisation statistics.

Any future changes to the suite of Labour Force products will be communicated ahead of time in upcoming Labour Force, Australia releases.

Survey collection

Survey collection in November will start on Sunday 3 November, one week earlier than usual, to allow for December collections to commence on Sunday 1 December 2024. January collection will follow normal collection timing and commence on Sunday 12 January 2025. Collection methodology can be found in the Methodology (/methodologies/ <u>labour-force-australia-methodology/oct-2024#collection-method)</u> page.

Survey response and timeline

The October 2024 Labour Force Survey was run in respect of the two weeks from Sunday 29 September to Saturday 12 October, and collected over the period from Sunday 6 October to Saturday 26 October.

The ABS would like to thank Australians for their continued support in responding to our surveys, given how critically important this information is.

Reference and Enumeration Dates

Publication	Start of Reference Week	End of Reference Week	Start of Enumeration	End of Enumeration
Sep-24	1st September 2024	14th September 2024	8th September 2024	28th September 2024
Oct-24	29th September 2024	12th October 2024	6th October 2024	26th October 2024
Nov-24	27th October 2024	9th November 2024	3rd November 2024	23rd November 2024
Dec-24	24th November 2024	7th December 2024	1st December 2024	21st December 2024
Jan-25	5th January 2025	18th January 2025	12th January 2025	1st February 2025
Feb-25	2nd February 2025	15th January 2025	9th February 2025	1st March 2025

Unemployment

In trend terms, in October 2024:

- unemployment rate remained at 4.1%.
- unemployed people increased by 800 to 623,500.
- youth unemployment rate decreased to 9.3%.

Unemployment rate

Large month-to-month changes occurred during the COVID-19 pandemic, resulting in multiple trend breaks. The ABS recommends caution when using trend estimates published in spreadsheets in this release for this period. Information on trend breaks can be found in <u>Labour Force</u>, <u>Australia methodology</u>, <u>October 2024</u> (/methodologies/labour-force-australia-methodology/oct-2024)</u>.

Employment

In trend terms, in October 2024, employment increased by 36,800 people (0.3%) to 14,541,200 people.

Flows into and out of employment

Flows into and out of employment are extensive and are based on the net matched sample of original employment growth between two consecutive months (around 80% of the sample). The (net) sum of the inflows and outflows does not necessarily equal the 'net' employment growth.

For October 2024, the net change in the number of employed people is the result of around 456,000 people entering employment (i.e. they were not employed in September 2024 but were employed in October 2024), while around 457,000 people left employment (i.e. they were employed in September 2024 but not employed in October 2024). This contrasts with September 2024, where around 482,000 people entered employment and around 391,000 people left employment.

Monthly inflows, outflows and employment growth, Original

caution when using trend estimates published in spreadsheets in this release for this period. Information on trend breaks can be found in <u>Labour Force</u>, <u>Australia methodology</u>, <u>October 2024 (/methodologies/labour-force-australia-methodology/oct-2024)</u>.

Full-time and part-time employment

In trend terms, in October 2024:

- full-time employment increased by 21,500 to 10,041,000 people, and part-time employment increased by 15,300 to 4,500,200 people.
- part-time share of employment was 30.9%.

Employment-to-population ratio

In trend terms, in October 2024, the employment-to-population ratio remained at 64.4%.

The employment-to-population ratio provides a measure of employment relative to the size of the population.

Employment-to-population ratio

Large month-to-month changes occurred during the COVID-19 pandemic, resulting in multiple trend breaks. The ABS recommends caution when using trend estimates published in spreadsheets in this release for this period. Information on trend breaks can be found in <u>Labour Force</u>, <u>Australia methodology</u>, <u>October 2024 (/methodologies/labour-force-australia-methodology/oct-2024)</u>.

Employment-to-population ratio, Seasonally adjusted

Hours worked

In trend terms, in October 2024, monthly hours worked in all jobs increased by 5.0 million hours (0.3%) to 1,971 million hours.

Monthly hours worked in all jobs

Large month-to-month changes occurred during the COVID-19 pandemic, resulting in multiple trend breaks. The ABS recommends caution when using trend estimates published in spreadsheets in this release for this period. Information on trend breaks can be found in Labour Force, Australia methodology, October 2024 (/methodologies/labour-force-australia-methodology/oct-2024)_

Monthly hours worked in all jobs, Seasonally adjusted

Participation

In trend terms, in October 2024, the participation rate:

- increased to 67.2%.
- remained at 71.3% for men and remained at 63.1% for women.

Participation rate

Large month-to-month changes occurred during the COVID-19 pandemic, resulting in multiple trend breaks. The ABS recommends caution when using trend estimates published in spreadsheets in this release for this period. Information on trend breaks can be found in Labour Force, Australia methodology, October 2024 (/methodologies/labour-force-australia-methodology/oct-2024)_

Participation rate, Seasonally adjusted

Underemployment

In trend terms, in October 2024:

- underemployment rate remained at 6.3%.
- underutilisation rate remained at 10.4%.

Underemployment rate and underutilisation rate

Large month-to-month changes occurred during the COVID-19 pandemic, resulting in multiple trend breaks. The ABS recommends caution when using trend estimates published in spreadsheets in this release for this period. Information on trend breaks can be found in <u>Labour Force</u>, <u>Australia methodology</u>, <u>October 2024 (/methodologies/labour-force-australia-methodology/oct-2024)</u>.

Historical charts

Historical charts for employed, unemployed, unemployment rate and participation rate from August 1966 to October 2024

Historical Labour Force estimates of employment, unemployment rate, and participation rate from the historical quarterly and monthly Labour Force Survey.

Prior to 1978 the historical Labour Force Survey was collected quarterly; the current Labour Force Survey is collected monthly. Please refer to the <u>history of changes (/methodologies/labour-force-australia-methodology/oct-2024#history-of-changes)</u> to see the differences between the historical and current Labour Force Survey.

Rotation group analysis

Sample composition and rotation

The Labour Force Survey sample can be thought of as comprising eight sub-samples (rotation groups), with each sub-sample remaining in the survey for eight months, and one group "rotating out" each month and being replaced by a new group "rotating in". As seven-eighths of the sample are common from one month to the next, changes in the estimates reflect real changes in the labour market, rather than changes in the sample. The replacement sample is generally selected from the same geographic areas as the outgoing one, as part of a representative sampling approach.

The sample comprises three components:

- the matched common sample (people who responded in both the current month and previous month)
- the unmatched common sample (people who responded in the current month but who did not respond in the previous month, or vice versa)
- the incoming rotation group (replacing people who rotated out)

The matched common sample describes the change observed for the same respondents in the current and previous month, while the other two components reflect differences between the aggregate labour force status of different

groups of people.

While the rotation groups are designed to be representative of the population, the outgoing and incoming rotation groups will almost always have somewhat different characteristics, as they reflect different households and people. The design of the survey, including the weighting and estimation processes, ensures that these differences are generally relatively minor and do not affect the representativeness of the survey and its estimates. Monthly estimates are designed to be representative, regardless of the relative contribution of the three components of the sample.

The contributions of the three sample components to the original estimates of employed, unemployed and not in the labour force are in the Contribution from sample components to estimates spreadsheet.

Estimates for the incoming and outgoing rotation groups

Incoming and outgoing rotation groups

	September outgoing rotation group	October incoming rotation group	October outgoing rotation group	October estimate (Original)
Employment to population ratio	66.5%	65.9%	64.2%	65.2%
Full-time employment to population ratio	46.3%	45.7%	44.0%	44.7%
Unemployment rate	3.2%	3.8%	3.7%	3.9
Participation rate	68.7%	68.6%	66.7%	67.8

States and Territories

In addition to analysis across the entire sample, the ABS also undertakes similar analysis for the responding sample in each state and territory each month, and highlights where there is a notable change for users to be aware of. In October, there were no noteworthy differences in the responding sample that were contributing to monthly movements for any of the states and territories. As with any notable month-to-month movement of this nature in state and territory estimates, the ABS recommends exercising a degree of caution in interpreting short-term changes.

As for its reporting for the entire sample, where the ABS has not highlighted a notable incoming rotation group effect, any larger changes should therefore be considered to reflect a broader change across the sample.

Comparability with seasonally adjusted and trend data

The gross flows and rotation group data are in original terms only, and are included to provide additional information on the month-to-month movements. They have a considerable level of inherent sampling variability, which is specifically adjusted for in the trend and seasonally adjusted series. The trend data provides the best measure of the underlying behaviour of the labour market and is the focus of the commentary in this publication.

Contribution from sample components to estimates

Data downloads

Labour Force Survey results are released in three stages.

- 1. Spreadsheets of the headline indicators are published in this release
- 2. Additional, more detailed spreadsheets and pivot tables are published in <u>Labour Force</u>, <u>Australia</u>, <u>Detailed</u> (/statistics/labour/employment-and-unemployment/labour-force-australia-detailed/latest-release) one week after this first release
- 3. Longitudinal labour force microdata are released in the ABS DataLab on a monthly basis, one day after the detailed release (see Microdata: Longitudinal Labour Force, Australia (/statistics/microdata-tablebuilder/available-microdata-tablebuilder/longitudinal-labour-force-australia))

See the <u>Survey output (/methodologies/labour-force-australia-methodology/oct-2024#survey-output)</u> section of Labour Force, Australia methodology for more information.
